

## 3 ways Citrix ShareFile® helps you get more from your Microsoft subscription

Citrix and Microsoft can come together to deliver a best-in-class experience that takes secure file sharing and real-time collaboration to the next level. More than 20 million business users and 80,000 customers already rely on ShareFile for secure collaboration.

Here's a look at 3 ways Microsoft plus ShareFile can give your users an even simpler way to access and secure data on any device, anywhere.

### 1. Providing control over document sprawl

With critical documents stored in a wide range of repositories like SharePoint and OneDrive for Business, ShareFile connects to these data sources— adding a layer of security while enabling mobility.

- Use ShareFile to connect Office 365, SharePoint, network shares and additional data repositories from a single app
- Get a single view of your files across Microsoft and non-Microsoft locations
- Access your files remotely from anywhere on any device without using FTP or VPN

### 2. Simplifying and securing external file sharing

ShareFile makes it simple to share documents both internally and externally, all while keeping everything secure.

- Securely send and share large files on any device
- Optimize file syncing across devices
- Control and track file downloads

### 3. Streamlining document and approval workflows

With ShareFile you can launch a timesaving workflow directly from your account and track the entire process in real-time.

- Edit and co-author documents with Microsoft Office web viewing
- Send documents for feedback and approvals or custom build your own workflow
- Request legally-binding electronic signatures for contracts and other important documents
