

Citrix ShareFile

Securely share content and collaborate with clients and internal teams from any device or location.

Departments and small businesses need simple, secure solutions to collaborate with clients and each other. With Citrix ShareFile, use any device to securely access files, share data, and create time-saving workflows. Simple, quick set-up – no IT required.

Securely access your files, share data, and create time-saving workflows across any device with Citrix ShareFile. Connect to documents and data from anywhere to speed collaboration and simplify feedback and approvals. Digitize paper-based processes with the integrated electronic signature solution - Citrix RightSignature.

Advanced security features let you control how sensitive data is stored, accessed, and shared, with remote wipe, device lock, passcode protection, and more. Add content protection with security analytics for proactive monitoring and detection.

	Policy-based administration
	Folder invitations
	Custom branding
	Offline Sync

For a free trial of ShareFile, visit sharefile.com/trial

1. Feature not enabled in 0 GB packages with on-premises-only storage.
2. Citrix integrates with popular DLP systems that support the ICAP protocol (Symantec Data Loss Prevention, McAfee Total Protection for DLP, and Forcepoint DLP) for customer-managed storage zone deployments to restrict document sharing based on the file's DLP classification. In addition, Citrix supports popular CASB integrations to address cloud service risks.
3. HIPAA Compliance is only available in ShareFile Premium. Certain features may be unavailable or limited for customers who need HIPAA compliance. Please speak to your salesperson about how to purchase the HIPAA-compliant ShareFile edition. HIPAA customers must have a signed BAA in place with Citrix. Archiving is available on a separate plan for those requiring legal or financial retainment of files.
4. Customers may choose to upgrade/downgrade their license types, but they may not mix storage entitlements. For example, a customer may buy Advanced and upgrade to Premium licenses for their organization or buy advanced licenses for a ShareFile account, buy Premium licenses for another ShareFile account
