

Simple, secure file sharing for your business

Share files, set detailed permissions, and streamline work on any device.

Secure enough for your business, easy to adopt and provision for every user.

Business-class data security

Up to 256-bit data encryption in transit and at rest, with SSL/TLS protection over SOC2 and SSAE 16 accredited datacenters.

Superior reliability and redundancy

99.9 percent uptime and disaster recovery centers in the United States and Europe, with configurable file backup, archiving, and versioning.

Simple, detailed user provisioning and permissions

Easily add and administer users through our web portal, and set custom permissions by file, folder, user, or device.

Secure and easy to use on any device

Accessible from anywhere using your smartphone or tablet, with the option to lock and wipe data remotely from any lost or stolen device.

ShareFile Plugin for Microsoft Outlook

Users can encrypt emails and attachments with one click directly from Outlook, aiding adoption throughout your organization.

Easy-to-use interface and 24/7 technical support

Customers can learn to use ShareFile in minutes. If anyone at your business needs help, they can get support around the clock from real, friendly people.
